

Accessing the Bredel Augmented Reality App

■ Install the free Vuforia View app from PTC inc.

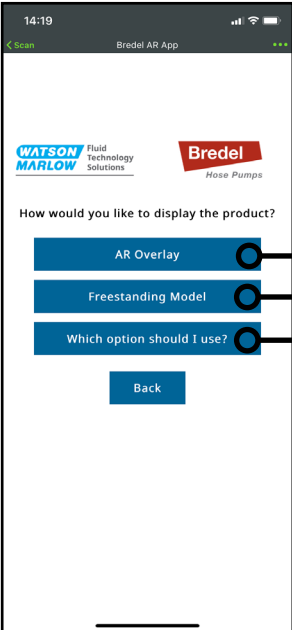

Information on [supported devices](#).

■ To view this AR experience, use Vuforia View to scan this QR code:

Alternatively, follow [this link](#).

App features

The screenshot shows the 'Bredel AR App' interface. At the top, it displays the time '14:19' and a 'Scan' button. Below the logos for 'WATSON MARLOW Fluid Technology Solutions' and 'Bredel Hose Pumps', the question 'How would you like to display the product?' is shown. Three radio button options are listed: 'AR Overlay', 'Freestanding Model', and 'Which option should I use?'. A 'Back' button is at the bottom. Arrows from the text box on the right point to each of these three options.

Maintenance mode selection

AR Overlay—users with access to physical product. This mode overlays a virtual model and animated instructions directly onto the physical product.

Freestanding Model—users without access to physical products. This mode will display a complete interactive 'virtual product' onto any flat surface in front of the user.

Which option should I use?
Contains description of above modes.
